FOR IMMEDIATE RELEASE

ViviScape Unveils Cogent Logistics: Cutting-Edge Transport Solutions for the Modern Era

Elkhart, IN – ViviScape, a leading Midwest-based software company, proudly announces the launch of product solutions in partnership with Cogent Logistics. Cogent provides a variety of groundbreaking, cloud-based transport solutions designed to enhance operational efficiency and scalability for organizations of all sizes.

Cogent is set to transform the transportation industry with its innovative and user-friendly modules. The product suite offers both standalone and comprehensive solutions to meet a variety of operational needs.

Introducing our two core offerings:

Cogent Cloud: A unified transport management suite that revolutionizes the movement, management, storage, and tracking of goods across entire enterprises.

Cogent Enterprise: The ultimate all-in-one solution, featuring a full TMS, mobile applications, and seamless integrations with platforms like QuickBooks, WEX/EFS, PC Miler, and Azure. Ideal for both large and small transporters, this module is highly customizable to fit unique operational requirements.

Features include:

- **Cogent Radar:** Provides real-time location and tracking of fleets with precise coordinate details.
- **Cogent Shuttle:** Optimizes tracking of unit movements, resource usage, and billing management within a cohesive ecosystem.
- **Cogent Beacon:** Enables quick monitoring and management of units, offering current and historical data on cargo.
- **Cogent Storage:** Facilitates easy management of storage units and tracks both short- and long-term storage fees.
- **Cogent JustDrive:** A mobile app for iOS and Android designed to streamline driver and fleet operations from a single, convenient platform.
- **Cogent TMS:** This tool enhances transport management for drive-away and tow-away operations, providing unparalleled control and efficiency.
